A Message from Kelly

Kelly Gardens

To Our Customers for 1924

This is our thirty-fifth year of distributing KELLY PLANT service. We appreciate this confidence and patronage and trust that we have merited a continuance. We have added greatly to our facilities and equipment for producing and distributing plants and service to you. We have added many plants to our catalog and our hope is that their use will make you happy and prosperous.

And I am, Yours to Command,

A. A. KELLY.

A. A. KELLY
Owner of Kelly Gardens

Guarantee

Our modern equipment and facilities with skilled experts enable us to test seeds, or grow any variety of plants for you, at a very nominal cost. We have been designated as one of the testing stations for the Rare Plant Division of the U. S. Department of Agriculture.

While I exercise every possible care to prevent improper mixing, labeling or descriptions, I am dependent upon the representations of seed growers as well as reversion of all plant life, therefore I cannot be held responsible beyond the purchase price paid us for plants, roots, seeds or cutting that I send you. If you are unwilling to accept my offering upon these terms, return at once and purchase price will be refunded.

We have Medals, Awards and Diplomas from all Expositions held in the west and northwest for 20 years upon the excellency of the KELLY GARDEN products.

LICENSED AND BONDED

I am licensed and bonded to the State of Washington to faithfully comply with the provisions of the law governing nurserymen and plant men.

This statute is a great protection to the tree, shrub and plant-buying public, and equally beneficial to the conscientious grower and dealer.

Asparagus

The grower finds this vegetable about the first one that always finds ready sale at profitable prices, and the earliest income of his "out-in-the-open" crops. In addition it is so easily harvested and prepared for market that indeed it is a most acceptable crop. No garden, whether it be for the market or the home, is really complete without a bed of good roots. To the truck farmer who is looking for a money-maker crop that will fit well into his large areas of crop production, he will find nothing better.

CULTURE—Perhaps no other vegetable plant of so much importance adapts and accommodates itself to any and all conditions of soil and climate. It really succeeds anywhere, but the better the conditions the better the crop. We ordinarily advise to select a location to one side or one end of the garden, because, like any permanent crop, it may be out of your way in other garden operations. Mark out the lines or rows, preferably north and south, four feet apart, and plow out the line, going at least twice, to make a furrow trench six to eight inches deep. Stretch a line in bottom of furrow, marked with colored twine every 20 inches to two feet, and set plant at each mark, spreading out the roots carefully, covering the roots three or four inches deep with nice, moist soil and covering (note this carefully) the "crown" only one inch deep. When set the crown should be four to five inches below the original and level surface of the field. As the tiny shoots appear, work in the loose soil to the furrow gradually until by early fall the field is level. A row or two of most any vegetable can be grown between the rows the first and second seasons, which will at least pay all expenses upon the non-income asparagus crop. The third year thereafter cutting can begin and the season lengthened for cutting as the plants become more aged. A bed is good for 20 years at least.

In the fall, when the tops are matured (yellow), mow and burn. The asparagus is a gross feeder and can utilize any kind of manure. Early in the spring loosen the whole surface with a cultivator or other suitable tool, but remember the crown is only four or five inches below the surface. If the crown or bud is destroyed, the roots are valueless.

The culture for the kitchen is substantially the same, only that the plants may be set 15 to 18 inches apart each way; however, by close planting the life of the bed is shortened. Our best authorities differ slightly as to the best age of plants for setting, being equally divided between the one and two-year-old plants. Possibly the majority favor the one-year-old for large plantations, while two year old are recommended where land is comparatively expensive and for smaller fields of from one to two acres. A three-year-old plant will be found satisfactory in the kitchen garden, or "filling in" where plants have occasionally missed.

WHEN TO PLANT—Set plants in March, April, May, September, October or November, 5,000 to 6,000 plants per acre; 50 to 100 plants for home garden.

2 **PALMETTO**—The best acquisition to our comparatively few varieties. It is less subject to rust and insect enemies than any of the older varieties.

3 **ARGENTEUIL**—This comparatively new variety is becoming very popular. It has much to recommend it, coming as it does from the greatest asparagus growing section of the world, near Paris, France.

PRICES ASPARAGUS ROOTS—Not Prepaid—

1 year—Doz., 25c; 25, 40c; 50, 75c; 100, \$1.00; 1,000, \$6.00

2 year—Doz., 40c; 25, 50c; 50, 85c; 100, \$1.50; 1,000, \$10.00

3 year—Doz., 50c; 25, \$1.00; 50, \$1.50; 100, \$2.25; 1,000, \$15.00

371 **WASHINGTON**—Pedigreed. The new rust resistant variety. Our strain from the Department of Agriculture of the U. S. tested seeds.

PRICE OR ROOTS—Not Prepaid—1 yr.—Doz., 35c; 100, \$2.00; 1,000, \$15.00

POTTED PLANTS

FOR FROSTY AND COLD LOCATIONS

The positively sure method of success in maturing TOMATOES, EGG PLANT and PEPPERS in the short season localities so common in these northern latitudes is to set KELLY'S INDIVIDUALS. Thousands upon thousands of the KELLY INDIVIDUALS containing these semi-tropical plants are annually doing their duty in maturing their fruit under unfavorable conditions. The whole secret is in the strong, thrifty plant, well hardened, growing in a specially prepared soil and the plant and roots are not in the least disturbed when resetting takes place. With this form and method, plants that are perishable by frost or inclement weather, until conditions are favorable, can be held and easily protected while growing all the

The additional cost of the KELLY INDIVIDUALS is a mere trifle when compared with the positiveness of the resultant crop.

The KELLY INDIVIDUALS plant pots are made from spruce veneer in two sizes. The small INDIVIDUAL is 2½x2½x3 inches and the large INDIVIDUAL is 4x4x3 inches.

It makes no difference where you are located, whether it is in the high mountains or the low valleys, the KELLY

INDIVIDUALS will reward you with matured TOMATOES, EGG PLANT and PEPPERS.

(Description, variety and prices will be found in the classified offerings throughout the catalog.)

FLOWERING PLANTS THAT WILL EMBELLISH YOUR HOME AND GROUNDS, SPEEDILY AND INEXPENSIVE
IL, WILL BE FOUND ELSEWHERE.

CABBAGE

Set April 1 to July 1, 50 plants for kitchen garden; 5,000 plants per acre.

The cabbage, having been bred to stand much rough treatment, can be relied upon to produce even under unfavorable conditions. This plant as well as the whole family (Brassicae), is subject to the ravages of many kinds of insect pests. The most destructive, probably, is the green cabbage worm, the progeny of the pretty white-winged butterfly. Arsenate of lead is the sovereign remedy for all leaf eating insects—1 lb. to 40 gallons of water—and sprayed frequently. The aphid, which usually is only destructive to the late summer or fall cabbages, can be eradicated by thoroughly spraying with black leaf forty or tobacco spray. For field culture, set the plants 20 inches apart in the rows and rows 2½ to 3 feet apart. For the kitchen garden, or where intensive culture is practiced, set the plants 20 to 24 inches apart each way.

- 4 **BRUSSELS SPROUTS (Half Dwarf)**—A very palatable cabbage vegetable. Very easily grown and profitable for the market gardener. The cabbage aphid is about the only pest, but can be quickly exterminated by the timely use of tobacco spray.

Postpaid, Doz., 15c; 50, 50c

- 5 **EARLY JERSEY WAKEFIELD**—The standard early variety the country over. The largest, most compact and hardiest of all early varieties, maturing in 70 to 80 days. Set plants April 1 to June 1.

Transplanted—

Postpaid, Doz., 20c; 50, 75c; 100, \$1.00; Not Prepaid, 1,000, \$7.00

Not transplanted—

Postpaid, Doz., 15c; 50, 50c; 100, 75c; Not Prepaid, 1,000, \$5.00

- 7 **COPENHAGEN MARKET**—A new introduction from Denmark. While extensively advertised as an early, with us it belongs to the second early class. It is a strong grower and will be found satisfactory as a second early or as a late variety.

Postpaid, Doz., 20c; 50, 75c; 100, \$1.00; Not Prepaid, 1,000, \$5.00

- 8 **DANISH BALL HEAD OR HOLLANDER**—Set May 10 to July 1, 7,000 plants per acre. The leading variety for market or home use, maturing in 100 to 110 days. The shrewd market gardeners now plant nothing else. It will make a head under the most unfavorable conditions and scarcely exceeds seven pounds with the best conditions. For this reason it can be grown quite close, and because of its solidity and uniform size it is always preferred by the merchant and consumer. Cabbage usually pays well and many seasons pays handsomely.

Seedlings Postpaid, Doz., 15c; 50, 50c; 100, 75c; Not Prepaid, 1,000, \$5.00

- 9 **CABBAGE, RED, FOR PICKLING**.....Postpaid, Doz., 15c; 50, 50c

- 6 **CABBAGE, FIELD GROWN**—Field grown plants of all cabbage varieties, usually ready in June.

Postpaid, Doz., 10c; 50, 35c; 100, 60c; Not Prepaid, 1,000, \$3.50

- 97 **CABBAGE**—Early varieties, in FLATS.....Each \$1.25 by Express, Not Prepaid

- 98 **CABBAGE**—Late varieties, in FLATS.....Each \$1.25 by Express, Not Prepaid

We deliver free to your express or postoffice all plants of 100 or less, except Asparagus Roots, Rhubarb Roots, in individuals, flats and potted plants.

Cucumber

- 20 **CUCUMBER (Individuals)**—A hill of plants growing ready to set out, that will produce "slicers" weeks in advance of the usual seed grown.....Not Prepaid, Doz., 75c; 100, \$4.00

- 21 **DILL**—The plant that gives the zest to dill pickles.

Plants—Postpaid, Doz., 15c; 100, \$1.00

- 66 **MATURED DILL**—At pickle time.....Postpaid, Bunch, 20c; Doz. Bunches, \$1.50

- 19 **CRESS (True Water)**—A most delicious salad plant. While it can be grown in a very moist location, it thrives best when its roots are submerged in running water. Any suitable location should have a supply of water cress.

Postpaid, Doz., 30c; 100, \$2.00

TEN LEADING CROPS THAT PAY IN EVERY MARKET AND EVERY SEASON

Strawberries Cauliflower Rhubarb Cabbage, Horse Radish Asparagus Peppers Tomatoes Onions Celery

STRAWBERRY HALLOCKS AND VENEER PLANT POTS

- 193 **VENEER PLANT POTS**—Size 2½x2½x3 inches. Made up ready to use. Can be used more than one season.

Not Prepaid, 50, 85c; 100, \$1.50; 500, \$5.00

- 194 **VENEER PLANT POTS**—Size 4x4x3 inches. Made up ready for use. Can be used more than one season.

Not Prepaid, 50, \$1.00; 100, \$1.65; 500, \$5.75

- 195 **VENEER STRAWBERRY HALLOCKS**—Made up ready for use. Each one strong, well made and durable. NOT the folding up kind. We offer them with or without the 24-pnt crate. (WRITE FOR PRICES.)

"IN A GOOD PLANT THE CROP IS MORE THAN HALF GROWN"

TOMATOES

TOMATOES

Outside of, perhaps, celery, no other vegetable crop returns so much money into the pockets of the market gardener as the tomato. The cities consume an unlimited quantity of the ripe product, the immense canning establishments require an unlimited quantity, and the green fruit finds a ready sale. Probably no other plant has less waste. Fabulous returns are yearly reported and in every instance can be traced to a strong, thrifty and hardy plant as a base. This is the one secret of successful tomato growing.

The plant is a native of tropical America and must have considerable heat in its propagation. Artificial heat with nothing short of glass covering is at all to be considered. Unless you have this necessary equipment, it were better that you secure your plants from a professional plant grower.

We have tested nearly all the leading varieties of merit on the light clay soils, and on the warm gravelly soils so common to this Northwest, and have decided that, to date, there is nothing better than the varieties listed. We maintain a trial grounds and would be pleased to test any variety that is well recommended from any of our friends.

CULTURE—A warm soil of medium fertility will grow good tomatoes. Irrigation is an aid, but much judgment should be used. Over-irrigation retards the ripening process. For field culture, mark out lines 4 or 5 feet, or if land is at hand, 5 feet by 5 feet. Set the plants at each intersection, just a little deeper than originally grown. Use a little water in setting, insuring a better stand if conditions after setting are unfavorable. Frequent cultivation (weekly) and artificial irrigation when the soil becomes so dry that assimilation of food cannot take place. The bacterial blight, or wilt, is a prevalent disease, and while no specific remedy is known, the Bordeaux mixture acts as a preventative. This is also true of the fungus or "black rot," "blister rot," etc., attacking the fruit at the blossom end. The little black flea beetle (*Haltica*) is extremely troublesome for a short time, but with a good spraying or two with arsenate of lead (one pound to 4 gallons) or a good coating of the leaves with air-slaked lime will discourage the lively little black bug.

Staking, tying and pruning the plant can be practiced by the home gardener with profit, but to the average grower for market or canners, it hardly pays for the extra labor and expense.

We Grow Our Own Tomato Seed

Our Short Season Gives Vigor and Earliness to Our Seeds

EARLIANA is unquestionably the greatest variety introduced. It is the earliest best tomato for the Northwest for we have tested everything of promise to date. KELLY'S strain of EARLIANA is from selected fruit matured in this cool north. Set tomato plants from May 10 to July 1st. It will require for an acre, set 4x4 feet, 2,725 plants; 4x5 feet, 2,175, and set 5x5 feet, 1,750.

41 TOMATO—KELLY'S EARLIANA—Transplanted. Postpaid, Doz., 30c; 50, 85c; 100, \$1.25; Not Prepaid, 500, \$4.50; 1,000, \$9.00; 5,000, \$40.00
Not transplanted. Postpaid, Doz., 20c; 50, 50c; 100, 75c; Not Prepaid, 500, \$2.50; 1,000, \$5.00; 5,000, \$20.00

58 TOMATO—KELLY'S EARLIANA—In FLATS. Each \$1.25 by Express, Not Prepaid.

63 TOMATO—KELLY'S EARLIANA—In INDIVIDUALS. Not Prepaid, Doz., 60c; 25, \$1.00; 50, \$1.75; 100, \$3.00; 500, \$12.00

35 TOMATO—KELLY'S EARLIANA—In large 4-inch INDIVIDUALS. Not Prepaid, Each, 20c; Doz., \$1.75; 100, \$10.00

42 TOMATO (Dwarf Champion or Tree)—A very robust strong, sturdy plant that produces the most solid and handsome fruit of any variety. Its quality is unexcelled. Very popular with some of our customers. It is later than our Earliana. Transplanted. Postpaid, Doz., 30c; 50, 85c; 100, \$1.25; Not Prepaid, 500, \$4.50; 1,000, \$9.00; 5,000, \$40.00
Not transplanted. Postpaid, Doz., 20c; 50, 50c; 100, 75c; Not Prepaid, 500, \$2.50; 1,000, \$5.00; 5,000, \$20.00

15 TOMATO (D. C. or Tree)—In FLATS. Each \$1.25 by Express, Not Prepaid.

71 TOMATO (D. C. or Tree)—In INDIVIDUALS. Not Prepaid, Doz., 60c; 25, \$1.00; 50, \$1.75; 100, \$3.00; 500, \$12.00

70 TOMATO (D. C. or Tree)—In large 4-inch INDIVIDUALS.....Not Prepaid, Each, 20c; Doz., \$1.75; 50, \$5.00

NOTE—We do not recommend the NOT transplanted tomato plants for setting out in the field unless climatic and soil conditions are extremely favorable. In the higher altitudes and cold sections of the northwest, however, many of our customers use these not-transplants for setting in cold frames, later setting in the field, with excellent results.

201 BONNY BEST—A little later than Kelly's Earliana. Attractive color, globular and solid. Worthy of trial. Transplanted. Postpaid, Doz., 30c; 50, 85c; 100, \$1.25; Not Prepaid, 500, \$4.50; 1,000, \$9.00

202 BONNY BEST—In FLATS.....Not Prepaid, \$1.25

BONNY BEST is now used almost exclusively for forcing in hothouses. We have plants in January and on.

(Continued on next page)

Tomatoes Continued

- 120 TOMATO (Red Cherry)—Bright red, ripens early. Excellent for preserving.
- 121 TOMATO (Red Peach)—An early red fruit.
- 122 TOMATO (Red Plum)—Plum shape and size.
- 123 TOMATO (Red Pear)—Very similar to pear in shape. This variety, like the Cherry, Peach and Plum, is excellent for preserving, canning, etc.
- 124 TOMATO (Yellow Pear)—A very popular preserving variety.
- Price of all Preserving.....Postpaid, Doz., 30c; 50, 85c

PEPPERS

PEPPERS—Set May 15 to June 15, 10,000 plants per acre. Requires a rich, warm soil. All of our sandy and gravelly soils are well adapted to this plant. Set in rows 12 to 15 inches apart and the rows 2½ to 3 feet apart, or 15 to 20 inches apart, each way. The cities use large quantities during "mango" and pickling season, and the peppers ship well long distances.

- 33 RUBY KING—The standard variety for many years. So sweet they can be eaten raw like an apple. In this latitude and climate will grow as large as the so-called Giants, and much more prolific.
Postpaid, Doz., 30c; 50, 75c; 100, \$1.00; Not Prepaid, 1,000, \$7.00
- 34 PIMENTO—A delicious sweet-flavored salad and stuffing pepper. The most popular in cultivation. Include this in your order.
Postpaid, Doz., 30c; 50, 75c; 100, \$1.00; Not Prepaid, 1,000, \$7.00
- 36 TOMATO RED PEPPER—Hot Pungent. Riven anywhere in this latitude. Just the variety to give "zest" to pickles and other foods. The green cherries are just as pungent as when ripe and will keep a long time after gathering. When dried will hold their flavor for years. Transplanted.....Postpaid, Doz., 30c; 50, 75c; 100, \$1.00; Not Prepaid, 1,000, \$7.00
- 11 CHINESE GIANT—The largest, sweetest pepper in cultivation. Bullnose type. Excellent for mangces.
- GOOD HOPE FARM, Spokane County.—"The Ruby King and Chinese Giant Pepper plants that we received from you in Flats are simply wonderful producers. The Chinese Giant were too large for a standard shipping crate."—John Van Hess, Proprietor.
- 29 OKRA or GUMBO—The young seed pods are used in soups, stews, etc. Set out at tomato season time. Easily grown.Postpaid, Doz., 25c; 50, 60c
- 39 SWISS CHARD—A spinach beet top greens—an attractive vegetable and quite popular...Postpaid, Doz., 20c; 50, 75c
- 40 TOBACCO—Set plants in June, 2 feet by 3 feet, 7,000 per acre. We annually grow a small field of tobacco and believe there are many locations in the Northwest where tobacco can be profitably grown. Its value as an insect repeller in the garden and poultry house is well worth the time to produce it. Wise orchardists are producing their own tobacco for spraying, at a big saving.
- WHITE BURLEY—The best variety for this locality.....Postpaid, Doz., 20c; 50, 75c; 100, \$1.25

Egg Plant

EGG PLANT—Set May 15 to July 10. 192—BLACK BEAUTY—In the large INDIVIDUALS. 4 inch, each 20c; Doz., \$1.75; 100, \$10.00.

Set plants 2x3 feet. A very delicious vegetable-fruit. Succeeds best on a warm sandy or gravelly soil that is fertile. If your soil is cold or season short use only our small or large INDIVIDUALS.

- 22 BLACK BEAUTY—The very best variety. Postpaid, Doz., 30c; 50, 75c; 100, \$1.25; not prepaid—1000, \$8.00.
- 190—BLACK BEAUTY—In FLATS. Each \$1.25 by express, not prepaid.
- 191—BLACK BEAUTY—In the INDIVIDUALS. Not prepaid. Doz., 60; 25, \$1.00; 100, \$3.00.
- 24—KALE—Dwarf. A succulent fall and winter greens. Postpaid—Doz., 20c; 50, 75c.
- 12—KALE—Chicken and Cow. A plant that will produce green succulent, relishable food for poultry and cattle from July till January. As each leaf is plucked the younger leaves are excited to more rapid growth which results in a continuous cropper plant.
Postpaid—Doz., 20c; 50, 65c; 100, \$1.

- 99—KALE—Chicken and Cow in FLATS. Each \$1.25 by Express, not prepaid.
- 25—KOHL RABI—An excellent, easily grown vegetable. When cooked has the flavor of turnips and cabbage, combined. Postpaid—Doz., 20c; 50, 75c.
- 26—LEEK—A close relation to the onion family. Mild and pleasing flavor. Easily grown with plants.....Postpaid 100, 35c; 500, \$1.50
- 18—CHIVES (Schnittlauch)—An onion-like plant with finely grown leaves. Invaluable for flavoring soups, stews and salads. One setting will last for many years as the roots multiply rapidly.

Postpaid, roots—15c bunch, Dozen bunches, \$1.25

WHEN EACH VARIETY IS SEASONABLE.

SEED POTATOES

INCREASE THE PRODUCTION OF YOUR POTATO CROPS BY PLANTING PURE BRED SEED FROM STOCK THAT IS CAREFULLY GROWN FOR SEEDING PURPOSES.

The numerous diseases of the potato which are very infectious and generally unknown to too many potato growers, are very largely the cause of light yields and poor keeping.

The State inspection of growing seed potatoes and the State certification does limit to a minimum the serious danger of potato production. Recently, great discoveries have been made by our Federal and State pathologists in identifying diseases of the plant and tuber (together with methods of prevention and treatment. And investigators and scientists are aiding our growers of seed potatoes, which will overcome the great losses in potato production that occur very periodically.

Seed potatoes grown here, in the cool north, are very vigorous and where careful attention is directed to roguing and selection with the proper safeguards of spraying and treating, our Northern grown seed has responded by greatly increased yields.

165 **POTATO**—Early Ohio. They are all of good average size, strictly pure, smooth, and free from scab or rot. It is an especial favorite with marketmen, and the most profitable they can grow. Sprout is very strong and vines grow erect, making it easy to cultivate, and on account of early maturity you get the highest market prices. Will keep firm till late in the spring. Frequently sold under the name of Early Six Weeks. Desirable for late planting as they keep well for winter.

Postpaid, 1 lb., 20c; 5 lb., 75c; Not Prepaid, 25 lb., \$1.00; 100 lb., \$2.50

368 **EARLY OHIO**—State Certified.....Not Prepaid, 100 lb., \$4.00

369 **EARLY OHIO**—Small size to be planted whole.. Not Prepaid, 100 lb., \$2.00

166 **POTATO (Netted Gem)**—Known also as California Russet, Netted Burbank, etc. It is the best main crop potato today and of the highest quality. Exceptionally fine for baking.

Postpaid, 1 lb., 20c; 5 lb., 75c; Not Prepaid, 25 lb., \$1.00; 100 lb., \$2.50

370 **NETTED GEM**—Small size.....Not Prepaid, 100 lb., \$1.75

167 **POTATO (Carman No. 2)**—A real good main crop variety. White skin and flesh and a late keeper. Will produce a fair crop on light soils.....Postpaid, 1 lb., 20c; 5 lb., 50c; Not Prepaid, 25 lb., 75c; 100 lb., \$2.00

197 **POTATO (Idaho Rural)**—Very popular and good quality.

Postpaid, 1 lb., 20c; 5 lb., 60c; Not Prepaid, 25 lb., \$1.00; 100 lb., \$3.50

198 **POTATO (Earliest of All)**—An early white skin variety. (Not certified.)

Postpaid, 1 lb., 15c; 5 lb., 60c; Not Prepaid, 25 lb., 75c; 100 lb., \$2.50

Horse Radish

CULTURE—Prepare ground as for any garden crop. Plant sets, sloping cut end down, in dibber holes, top of set one inch below surface. One foot apart in the row and rows 2½ to 3 feet, or set 20 inches apart each way.

23 **COMMON VARIETY**—Plant in April and May, 10,000 sets per acre. One of the most profitable of garden crops. Smooth, nice roots will always sell on any market. Always treat it as an annual by digging the entire crop every fall and winter and resetting each spring.....Postpaid, Doz., 30c; 50, \$1.00; 100, \$1.50; 1,000, \$10.00

SEND US YOUR ORDER NOW, WILL DELIVER AS DIRECTED OR WHEN EACH VARIETY IS SEASONABLE.
"IN A GOOD PLANT THE CROP IS MORE THAN HALF GROWN"

Sweet Potatoes

SWEET POTATOES

CULTURE—A warm, sandy loam is the ideal soil and should be reasonably well supplied with humus. Location should have southerly exposure. Set the plants on ridges, made by throwing two shallow furrows together and smoothing down, rounding with rake or light harrow, setting the plants (slips) 18 to 20 inches apart in the row, rows 3 feet apart.

44 **SWEET POTATO PLANTS**—Set plants in June, 9,000 plants per acre. Price of plants.

Postpaid, Doz., 30c; 50, \$1.00; 100, \$1.50; 1,000, \$10.00

196 **SWEET POTATO SEED**—We will agree to properly pack and deliver to carriers in first-class condition but, under no circumstances will we guarantee safe delivery or sound condition to destination. Write for prices on sweet potatoes.

IN QUANTITIES—Postpaid, 5 lbs., \$1.00; 20 lbs., \$3.00

Herbs

Access to a supply of green-growing aromatic and medicinal herbs aid greatly in the culinary art of the housewife.

45 **BASIL (Sweet)**—An aromatic annual. For soups and sauces.

46 **CARAWAY**—Seeds used for pas ry, bread, etc. Leaves are used for colic in children.

47 **MARJORAM SWEET**—Leaves used for dressings, broths, etc. Dry the leaves for winter use.

48 **SAVORY (Summer)**—Used extensively for flavoring meats, stews, dressings, etc.

49 **THYME**—An aromatic perennial for seasoning. Its medicinal properties are highly recommended for sick and nervous headaches. All Herbs.....Postpaid, Doz., 30c; 50, \$1.00

28 **MINT (Spearmint) PLANTS**—The flavor is a lasting, agreeable one, for sauces, stews, etc. Very hardy, perennial.Postpaid, Each, 10c; Doz., 75c; 100, \$4.00

38 **SAGE (English Mammoth—Perennial)**—So easily grown and most used of all herbs; every garden should have at least a dozen plants. Very hardy—indispensable for fowl dressing, winter sausage and head cheese.

69 **1 Year Roots**.....Plants Prepaid, Doz., 30c; 50, \$1.00
Not Prepaid, Each, 20c; Doz., \$1.50; 100, \$10.00

Cauliflower

It is generally supposed that this always high-priced vegetable is very difficult to produce. It is if your propagation stock, whether it be seeds or plants, is inferior.

I am using the very best cauliflower seed produced, grown by one of the most expert growers in the world.

11 **CAULIFLOWER—SNOWBALL**—for the early crop, set during the first half of May. Late crops the most profitable, set May 10 to July 1, 7,500 plants per acre. Matures 80 to 100 days. We offer the very best imported direct from one of the most successful cauliflower seed growers in Europe. Fall matured cauliflower is a handsome paying crop; always ready sale in any market. Every fall and pickling season finds our markets bare of good, solid cauliflower.

Postpaid, Doz., 30c; 50, \$1.00; 100, \$1.25; Not Prepaid, 1,000, \$7.00

74 **CAULIFLOWER—Snowball in FLATS**. Each \$1.25 by Express, Not Prepaid

17 **CHICORY—WITLOOF or FRENCH ENDIVE**—The roots can be used when dried and parched as a substitute for coffee, but this variety is purposely grown for Witloof, used as a salad, both raw and cooked. Set the root in a trench, cover with soil 3 to 6 inches, and when the tops appear cut off an inch or so from the crown. This blanched "Witloof" or "French Endive" is an epicurean delicacy.

Strong roots.....Not Prepaid, Doz., 50c; 100, \$2.25

Lettuce

27 **LETTUCE—Wonderful**—If you want a big, solid head lettuce, let us supply your plants. Slow to run to seed. Postpaid, Doz., 15c; 100, 60c; Not Prepaid, 1,000, \$4.00

We have a stock of Grand Rapids Lettuce plants in any quantity from September to May for hot house and hot bed planting—White for prices.

Ground Cherry Plants

43 **TOMATO, HUSK or GROUND CHERRY**—Unexcelled for canning, preserving, etc. Fruit of a handsome yellow color, easily grown and will keep a long time if husks are removed. Postpaid, Doz., 30c; 50, 85c; 100, \$1.25

"IN A GOOD PLANT THE CROP IS MORE THAN HALF GROWN"

Rhubarb or Pie Plant

The large, fleshy stalks filled with pleasantly acid juice and used the year around. It is the universal favorite during the spring as a substitute for fruit, and its medicinal properties are well known. Peeled, sliced, packed in jars, cover with cold water and seal, it keeps indefinitely. Its season is lengthened by enterprising growers by digging the roots which are two years old or more in late fall, allowing to freeze thoroughly, and when frozen, set in dugout, cellar, furnace pit, under the green house benches, or most any place where sufficient soil can be placed around the roots, kept moist and dark at a temperature of about 45 to 55 degrees. Grown in this manner, the quality is superb, without much leaves or epidermis. The market grower will find this means of propagation very profitable, with scarcely any limit to the demand, being offered at a time when fruits and vegetables are scarce. The rhubarb is so easy of culture that no directions seem needed. It is so hardy that it will grow under the most unfavorable conditions, yet no plant responds better to high culture. It is a gross feeder of animal manures with sufficient moisture to liquify. In a word, no garden is complete without this easy growing and profitable plant. We offer you strong, sturdy roots.

37 **MAMMOTH VICTORIA**—There is nothing better regardless of the euphonious names given to this plant by some plantsmen.

—NOT PREPAID—

1-year—Each, 10c; Doz., \$1.00; 50, \$3.00; 100, \$5.00; 500, \$15.00; 1,000, \$30.00
 2-year—Each, 20c; Doz., \$1.50; 50, \$4.00; 100, \$6.00; 500, \$20.00; 1,000, \$40.00
 3-year—Each, 35c; Doz., \$3.00; 50, \$8.00; 100, \$15.00; 500, \$50.00; 1,000, \$100.

Onion Plants

- 30 **ONION**—Big plants ready to set out and will produce a more tender green onion and earlier than from sets. Will mature big bulbs a month earlier than from seed. Plants much cheaper than sets and more reliable than seeds sown. Postpaid, 100 plants, 35c; 1,000 plants, \$2.50
- 32 **PARSLEY (Moss Curled)**—A bed of parsley is a requirement in the kitchen garden. The "chef" will find many uses in garnishing and flavoring. The plants can be lifted in the fall, transplanted in boxes, set in a warm, sunny location and will furnish green sprigs all winter, or the leaves can be dried without the loss of flavor. Postpaid, Doz., 20c; 50, 50c
- 67 **PARSLEY ROOTS**—For winter forcing. Postpaid, Doz., 50c; 100, \$2.00
- 68 **PARSLEY IN POTS**—Place in your kitchen window and have green parsley all winter. Not Prepaid, Each pot, 35c

FLATS---A Sure Crop

FLATS, or shallow boxes, containing about sixty growing plants, is the most positive method of securing a 100% stand and a maximum crop, excepting only our POTTED INDIVIDUALS. If for any reason, you do not wish to set them out upon arrival, they may be kept for weeks, growing steadily. The plants are spaced evenly so that you may cut out a 1x2x3 inch cube of soil, with each plant, preventing wilting or setback.

Hundreds of our customers prefer KELLY PLANTS in FLATS for they are sure of a crop of vegetables and flowers.

We can supply FLATS of TOMATO, CABBAGE, KALE, PEPPERS, CAULIFLOWER, EGG PLANT, PANSY, CARNATION, KOCHIA, ASTERS, SALVIA, ETC. Note—For your choice in variety refer to classified plants throughout the catalog. FLATS each \$1.25, not prepaid. PARCEL POST OR EXPRESS.

"IN A GOOD PLANT THE CROP IS MORE THAN HALF GROWN"

CELERY

CULTURE—Of the vegetables that are grown in large quantities, celery is unquestionably the most profitable. Three important requirements are essential—good plants, rich soil, plenty of moisture. The rest is easy. Make a shallow furrow two or three inches deep, set the plants seven inches apart and the rows four feet or more apart. Use a dibber (round pointed harrow stick), open the soil. Set the plant, firmly cover the roots, but do not cover the tiny heart of the plant. The double row is only adding another row of plants seven inches apart each way and the rows five feet apart. When the plant has grown five or six inches in height, firmly grip the plant near its top with one hand and draw the soil up to it, being careful not to let any soil get in between the leaves. This operation is called "handling." Add the dirt as it grows until it is matured and ready for the market. Light boards may be used for bleaching by placing on either side of the row when plants have attained about 1 foot in height.

The intensive system as we partly use it is to set the plants upon the level surface 12 by 12 inches apart each way.

Clean and frequent cultivation. No hilling required, as the closeness of the plant is sufficient to exclude light, which favors bleaching.

Our crops of White Plume celery are considered by all the finest ever offered in this market.

65 **CELERY—White Plume**—In FLATS. Each \$1.25 by Express, not prepaid.

73 **CELERY—Golden Self Blanching**—In FLATS. Each \$1.25 by Express, not prepaid.

12 **PERFECTED WHITE PLUME**—This is a magnificent celery and most easily grown; its clear whiteness makes it an ornament to the table, and its quality well high perfect.

14 **GOLDEN SELF BLANCHING**—It has of late years sprung into popular favor and deserves much credit. It belongs to the dwarf varieties, not over 20 inches in height, solid, compact, yellow heart, finest quality. It is now grown to the exclusion of all varieties in California for shipping North and East. This variety will surely please you or your customers.

110 **EASY BLANCHING**—The production again in my fields this last season now convinces me that it is a very valuable addition to our celery varieties. It is a rapid grower and seems to me that it does not require the exacting conditions of the Golden Self Blanching. It bleaches to a beautiful white yellow and the best quality. It will keep fairly well, but severe frosts tend to make the leaf stalks pithy. Be sure to try this new variety.

One dozen of our Golden Self Blanching—Weight 44 lbs.

CELERY PLANTS

TRANSPLANTED—Postpaid, Doz., 25c; 50, 65c; 100, \$1.00; Not Prepaid, 500, \$3.00; 1,000, \$6.00

Prices Celery Plants—White Plume, Golden Self Blanching, Easy Blanching—Postpaid, Doz., 20c; 50, 50c; 100, 75c; Not Prepaid, 500, \$2.50; 1,000, \$5.00

16 **TURNIP ROOTED CELERY**—In this variety of celery the roots have been developed and not the leaf stalk. The edible root is easily grown in rich, moist soil. Excellent for soups, stews, and makes a delicious salad.

Postpaid, Doz., 25c; 50, 75c

Attention Tomato Growers

We have grown a quality crop of Tomato seeds owing to the most advantageous season of 1922, that we have ever experienced. The fruit that we have selected for our own private stock is as near our ideal as is possible and is what we have been aiming to secure in the Earliana variety of Tomato. Our ideal has been a globular fruit ripening evenly, solid and with small seed cavities. Then the plant must have at least twenty uniformly developed fruit with fully as many more of like character but perhaps somewhat later in maturity. We have harvested a somewhat limited crop from these select specimens which we use for our plant propagation and offer it as our private stock. Our No. 1 stock of seed is from select specimens discarding all fruit that does not show globe tendency in shape and otherwise defective.

281 **KELLY'S EARLIANA**—Private stock. Postpaid.
Pkt., 25c; ¼ oz., \$1.00; ½ oz., \$1.50; 1 oz., \$3.00

282 **KELLY'S EARLIANA**—No. 1 Selected. Postpaid.
Pkt., 25c; ¼ oz., 50c; 1 oz., \$1.50

372 **CELERY (Golden Easy Bleaching)**—It is dwarf to half dwarf, growing about 25 inches in height, wonderfully stocky, very heavy, perfectly solid, of delicate flavor and a very good keeper, ready for the table or market in 110 days. Added to these points is its great distinctive feature of being literally self-blanching. Our Spokane customers say "it is the best ever seen on this market." Supply limited.
Postpaid, Pkt., 50c; ¼ oz., \$2.50

373 **NOTTS EXCELSIOR**—A standard extra early dwarf pea. Height, 12 inches. Pods light green, 3 inches long.....Postpaid, 1 lb., 30c; Not Prepaid, 10 lbs., \$2.00

374 **TELEPHONE**—The standard market gardener's main crop. Bears an abundance of long, straight, pointed pods, filled with large peas of a rich sugary flavor.....Postpaid, 1 lb., 30c; Not Prepaid, 10 lbs., \$2.25

375 **GOLDEN WAX**—Very popular, both for home garden and for market. The pods are of medium length, broad, flat, golden yellow, very fleshy, wax-like, and stringless.

BEANS—BUSH

376 **VALENTINE**—Pods are pale green, long and straight, round, meaty and of excellent flavor.
Postpaid, 1 lb., 30c; Not Prepaid, 10 lbs., \$2.25

POLE BEAN

377 **KENTUCKY WONDER**—This variety is the most practically useful of the green podded pole bean. Suitable for use as snaps. Postpaid, 1 lb., 30c; Not Prepaid, 10 lbs., \$2.25

378 **GOLDEN BANTAM**—This new sweet corn is described as the tenderest, sweetest and best sweet corn in existence. Postpaid, 1 lb., 25c; Not Prepaid, 10 lbs., \$2.00

Use KELLY PLANTS and have better GARDENS than your Mother ever had.

(Continued on next page)

Vegetable Seeds

- 379 **EARLY EVERGREEN**—This variety is more largely planted than any other, being the general favorite with market gardeners for late use. Postpaid, 1 lb., 25c; 10 lbs., \$2.00

ATTENTION—PEPPER GROWERS

We are offering an extra fine quality stock of the popular varieties of peppers. It is almost unbelievable that in this far north latitude that this semi-tropical plant can be propagated so as to mature its fruit for seed production. We have harvested a good crop of seeds in the following varieties:

- 283 **PEPPER (Ruby King)**—
Postpaid, Pkt., 25c; ¼ oz., 30c; 1 oz., \$1.00
- 284 **PEPPER (Pimento)**—
Postpaid, Pkt., 25c; ¼ oz., 30c; 1 oz., \$1.00
- 285 **PEPPER (Chinese Giant)**—
Postpaid, Pkt., 25c; ¼ oz., 30c; 1 oz., \$1.00
- 112 **ASPARAGUS (Argenteuil)**—A comparatively new French introduction. Very popular in our South western states. Disease resistant.
Postpaid, oz., 20c; ¼ lb., 60c; 1 lb., \$1.50
- 113 **ASPARAGUS (Palmetto)**—The very best variety. Finest quality and best for planting.
Postpaid, oz., 20c; ¼ lb., 45c; 1 lb., \$1.25
- 114 **BEETS (Early Egyptian)**—Dark Red.
Postpaid, oz., 15c; ¼ lb., 40c
- 115 **SWISS CHARD (Lucullus)**—A very delicious vegetable, easily grown.....oz., 15c
- 116 **BRUSSELS SPROUTS**.....Postpaid, Pkt., 10c
- 100 **CAULIFLOWER (Snowball)**—
Postpaid, Pkt., 25c; ¼ oz., \$1.00; oz., \$3.00
- 117 **CABBAGE (Early Jersey Wakefield)**—The earliest best cabbage in existence.
Postpaid, Pkt., 10c; oz., 30c; ¼ lb., \$1.00
- 106 **CABBAGE (Copenhagen Market)**—The largest of the second early varieties.
Postpaid, Pkt., 10c; oz., 30c; ¼ lb., \$1.00

- 105 **CABBAGE (Danish Ball Head)**—The best late cabbage grown. Postpaid, Pkt., 10c; oz., 30c; ¼ lb., \$1.00
- 118 **CABBAGE (Red Rock)**—Best for pickling.
Pkt., 10c; oz., 35c
- 119 **CARROTS (Oxheart)**—An easily pulled table variety.
Pkt., 10c; oz., 20c
- 102 **CELERY (White Plume)**—The most popular white variety.....Pkt., 15c; oz., 50c
- 103 **CELERY (Golden Self Blanching)**—A handsome fall and winter celery.....Pkt., 20c; oz., \$1.50
- 126 **CELERY (Easy Blanching)**—A new variety. Whitish-yellow heart with green leaves...Pkt., 15c; oz., 50c
- 127 **CUCUMBERS (Davis Perfect)**—The best slicing cucumber.Pkt., 10c; oz., 15c; ¼ lb., 50c
- 128 **EGG PLANT (Black Beauty)**—The best variety.
Pkt., 10c; oz., 50c
- 129 **KOHL RABI (Early Purple)**—A relishable vegetable with the flavor of cabbage and turnip combined,
Pkt., 10c
- 131 **DILL**—Produces a plant the whole of which is used to flavor pickles.....Pkt., 10c; oz., 25c
- 132 **KALE (Dwarf)**—A fall and winter greens.
Pkt., 10c; oz., 30c
- 133 **KALE (Chicken and Cow)**—This plant produces more green food for chickens and cattle than any other plan.....Pkt., 10c; oz., 25c
- 134 **LETTUCE (Grand Rapids)**—A leaf lettuce for greenhouse and outside.....Pkt., 10c; oz., 30c
- 135 **LETTUCE (Wonderful)**—The best head variety.
Pkt., 10c; oz., 30c
- 136 **MELON MUSK (Rocky Ford)**—A deep netted standard variety.....Pkt., 10c; oz., 25c
- 137 **MELON (Honey Dew)**—A new type of melon, claimed to be the cross of the muskmelon and the casaba.....Pkt., 15c; oz., 40c
- 138 **WATERMELON (Kleckley's Sweet)**—The best early melon.....Pkt., 10c; oz., 20c
- 139 **PARSNIPS (Hollow Crown)**—The best variety.
Pkt., 10c; oz., 20c
- 140 **PARSLEY (Moss Curled)**—The leading variety.
Pkt., 10c; oz., 20c
- 144 **ONION (Prizetaker)**—A large, mild light yellow skin.....Pkt., 10c; oz., 30c
- 145 **ONION (White Globe)**—A large white, good keeper.
Pkt., 10c; oz., 30c
- 146 **PUMPKIN (Sugar)**—The sweetest for pies.
Pkt., 10c; oz., 25c
- 147 **RADISH (Early Scarlet Turnip)**—The quickest and best.....Pkt., 10c; oz., 20c
- 148 **SPINACH (Bloomsdale Savoy)**—The finest quality.
Pkt., 10c; oz., 20c
- 149 **RHUBARB (Victoria)**—The mammoth variety.
Pkt., 10c; oz., 20c
- 109 **TOMATO (Dwarf or Tree)**—A sturdy, vigorous growing plant that produces the very best quality in fruit.....Pkt., 10c; oz., 25c
- 152 **SQUASH (Giant Crookneck)**—A good early variety.
Pkt., 10c; oz., 20c
- 155 **SQUASH (Boston Marrow)**—A fine quality late summer and fall squash.....Pkt., 10c; oz., 20c
- 156 **SQUASH (Hubbard)**—The best fall and winter variety.....Pkt., 10c; oz., 20c
- 157 **RUTABAGA (Purpletop)**—A superior yellow variety.
Pkt., 10c; oz., 20c
- 158 **TURNIP (White Globe)**—Fine quality. Best for market.....Pkt., 10c; oz., 20c

The New Strawberry Kellys' Spokane

SECURED BY SELECTING FROM TYPES THAT HAD OUTSTANDING CHARACTERISTICS APPROACHING OUR IDEALS FOR AN ADAPTABLE VARIETY FOR THE COMMERCIAL GROWER AS WELL AS FOR THE HOME GARDEN IN OUR GREAT WEST.

It is a standard variety and so far in our trials it has had no inclination to bear fruit the first season but devotes its energy into building itself in a robust plant for the big crops to follow in succeeding years.

The ambition of every plant propagator is to increase the essential characteristics of Strawberries that will meet the requirements of his present and prospective customers in at least those of quality, quantity and adaptability.

We are offering the SPOKANE in quality, equal to any variety of the forty or more that we have tested. It is as prolific as even the best of standards and gives us promises of adapting itself to most any soil in the west. It is a very strong plant with unusual large, thick leaves that will prove to be a strong drought and fungus resistant. It seems lacking in heavy plant production which is encouraging for large and heavy fruit production.

Our efforts have been directed to the introduction of a strawberry plant that will yield a heavy crop of fruit the second and third season after planting upon our non-irrigated soils, with the SPOKANE as the result and it will exceed the expectations of the most sanguine in the irrigated sections.

It is a mid-season, staminate, maturing during June and July in a wide latitude.

WE UNHESITATINGLY RECOMMEND THE SPOKANE FOR YOUR PLANTING

That the SPOKANE will have rapid and universal distribution we have priced them very reasonable.

80 **AROMA**—While a trifle later than the intermediate varieties, it will yield a very large part of its crop in the very first pickings; it will continue about as late as Gandy, and with us it produces a fair picking after every other variety has quit. It is planted extensively both North and South.

81 **WARFIELD**—The most popular pistillate variety grown. It is large, beautiful, cone-shaped berry with a fadeless, dark red exterior; the deep color is extended clear to the center of the fruit. Any variety that we offer will fertilize it except Gandy or Aroma.

82 **CLARK'S SEEDLING**—This variety originated in our state; a seedling of the old popular Wilson variety. Like the Hood River, a near relation, it is unsurpassed as a shipping variety, and in some sections very prolific.

159 **SPOKANE**—Postpaid, Doz., 35c; 25, 65c; 50, \$1.00; 100, \$1.75; Not Pre-paid, 200, \$3.00; 300, \$3.75; 500, \$5.00; 1,000, \$10.00

95 **CHESEPEAKE**—We have added this most popular late variety upon the endorsement of many critical strawberry growers.

paid, 200, \$3.00; 300, \$3.75; 500, \$5.00; 1,000, \$10.00

"IN A GOOD PLANT THE CROP IS MORE THAN HALF GROWN"

Standard Varieties of Strawberries

We Have No Strawberry Pests

STATE INSPECTED

CULTURE—To secure extra large fruits, the hill culture, i. e., setting the plants 2 feet apart each way, keeping all runners trimmed, will give the best results. The strawberry grower who grows for market and money will hardly find the above

system as profitable as setting the plants from 12 to 15 inches apart in the row and the rows from 2½ to 3 feet apart. His aim should be, the first season to grow a strong mother plant, fruiting it for the two following seasons, and as soon as the second crop is harvested, plow the field down.

SETTING PLANTS

Your ground should be worked up mellow and free from clods just before planting. After this is done, mark off the ground according to the system of planting you are going to use. A flat dibble or trowel should be used for making the holes, although when two people are working together the spade is a good tool for this purpose as one can go ahead and make the holes with the spade while the other follows and places the plants in the holes and firms them in. After pushing the dibble or spade in the ground it should be worked forward and backward a little so as to make the hole large enough for the roots to be straightened out—fan shape—before the dirt is firmed around them. It is very important that the crown of the plant is just at the surface of the ground—not above or below. The roots of the plants should be wet just before setting and it is also a good plan to trim off the roots by about one third.

96 **NICK OHMER**—This variety has become practically a universal favorite, especially noted for its fine, rich flavor, for its large, well-shaped berries and rich crimson color of its fruit.

83 **MAGOON**—Indeed in this splendid berry we have almost perfection. Of first quality, great productiveness, attractive shape and color; nothing better for canning. For the local market or home garden, nothing surpasses it, and with but few equals.

84 **HOOD RIVER**—The leading standard shipping variety. The berry that has made the town of its name famous, and its growers financially rich. Dark red color, uniform size, good quality, but not heavy in yield. A specialty berry for the grower whose market is somewhat distant.

85 **NEW OREGON**—A comparatively new variety, originating in the state which bears its name. It belongs to the Hood River type, or Wilson's Albany, and the claim for its superiority is in its great productiveness, not losing the shipping qualities of the famous Hood River. The young plants are most robust, and have the characteristic of a variety that will prove very successful on non-irrigated soils.

86 **GOLD DOLLAR**—A California variety. The first imported berry that arrives in our state worth while. Medium in size, conical in shape, light red in color. It is the first early berry that I have considered of sufficient merit to catalogue.

87 **GLEN MARY**—A bright, handsome standard sort, grown the country over and perfectly reliable.

88 **SENATOR DUNLAP**—Its color is a rich dark red with glossy finish. It has become a very popular variety on account of its uniformity. The plants are rather small but strong and vigorous and carry much pollen, which usually insures a heavy crop production. In yield, it compares favorably with any variety.

Progressive Everbearing Strawberry

EVERBEARING STRAWBERRIES are the greatest addition to the small fruit family that has ever been introduced. Anyone can appreciate the economic value of the EVERBEARING when the fruit production has been hastened at least nine months.

Think of picking ripe fruit ninety days from the setting of the plant and continually fruiting until the freezing of the fruit and plant prevents further growth, in the early winter.

Then the following spring the EVERBEARERS resume their activities with all varieties of strawberries but differ from the standard varieties, in that the EVERBEARERS continue fruiting all the summer and fall. KELLY'S PROGRESSIVE AND SUPERB have repeated their continuous fruiting from spring till winter, for four years in succession, and the last year's crop about as good as either of the other years, with this possible exception, that the first year's fruit seemed a little larger than other years' production.

Among our southland customers where frozen soil condition do not prevail, they are very enthusiastic in their report, that the KELLY EVERBEARERS have produced continuously for more than one year, before the period of dormancy took place. This is accounted for by the well-known established fact that the KELLY PLANTS grown in the cool north, free from disease and pests, are vigorous and capable of heavy production.

93 **PROGRESSIVE**—Postpaid, Doz., 40c; 25, 75c; 50, \$1.25; 100, \$2.50; Not Prepaid, 200, \$4.50; 300, \$6.00; 500, \$7.50; 1,000, \$15.00

Everbearing Superb Strawberry

No matter where you live we can send you SAFELY the KELLY EVERBEARERS and today make out your order and enjoy luscious strawberries all of this summer and succeeding years.

For many years we have been improving EVERBEARERS by selection and careful roguing so that we are positive that we have in the KELLY SUPERB and KELLY PROGRESSIVE strains the most prolific, best quality and TRUE EVERBEARING to be had from any source. Big crops of big fruit in Strawberries are the result of rich soil and abundance of moisture.

WITH THE KELLY STRAIN YOU NEED NOT REMOVE THE FIRST BLOSSOMS.

Our stock of EVERBEARERS is large and we expect to fill every order this season but we know it is good advice to permit us to book your orders early. We usually begin digging EVERBEARERS in March. Early set plants will prove most satisfactory.

92—**STRAWBERRY SUPERB**—Everbearing. The fruit is large, firm and of the best quality. We recommend it as the best variety, everything considered, for a market berry. Postpaid, Doz., 40c; 25, 75c; 50, \$1.25; 100, \$2.50; Not Prepaid, 200, \$4.50; 300, \$6.00; 500, \$7.50; 1,000, \$15.00

Strawberries Continued and Strawberry Price List

- 89 **MARSHALL**—If you will give this variety the extra care with which it quickly responds, you will have the very largest and most beautiful fruit for your trouble.
- 90 **WM. BELT**—Nothing better for quality, shape and attractiveness.
- 91 **GANDY**—The plant is a rampant grower; having strong fruit stems, holding the heavy weight of the fruit erect; slow in forming and thereby ripening its fruit, and in the height of its glory, when the early and midseason varieties are about done fruiting.
- 94 **BRANDYWINE**—A medium to late old standard variety.

(P)—Pistillate or Imperfect.

OUR PRICES ARE AS LOW AS IS CONSISTENT WITH GOOD STOCK, FRESH DUG, PROPERLY PACKED AND DELIVERED TO YOU IN A CONDITION THAT WILL GIVE YOU CROP RESULTS.

Many of the largest growers of Strawberries, Tomatoes, Peppers, Cabbage, Asparagus, etc., secure their plants from us, realizing that our stock is more productive and consequently more profitable than otherwise secured.

Please remember that lower prices than ours must sacrifice quality, variety or condition of plants when you receive them. Our prices are as low as is consistent with plants or stock freshly taken from the soil, graded, nicely bunched, packed in clean solid containers, so that when you receive them the plants will be fresh and vigorous.

We realize the lack of detailed description in our catalog, but must condense as much as possible to reduce the expense which is better made up in good stock delivered to our customers in first class condition.

Our plants are produced from select varieties of seeds and my years of experience and skill will give you a plant that will reward you with a sure crop for market or home.

Please remember that the successful and profitable crop or the ornamental beauty of the plant will remain with you, long after the price for the propagated plant is forgotten.

FERTILIZERS

- 199—**MANURE**—Animal. As everyone knows animal manures are the best food for a hungry, poor soil. Not only the fertility that it contains but the organic matter is equally essential to plant growth. We decompose hundreds of tons annually and offer this "best of all" fertilizer well rotted. Price not prepaid—25 lbs., 75c; 100 lbs., \$2.00; One ton, \$20.
- 200—**NITRATE OF SODA**—This salt is the most quick acting stimulant to plant growth known. We have had plants to change their color in four days' time by the use of nitrate. Not prepaid—1 lb., 10c. Write for prices on quantities.

GOOD HOPE POULTRY FARM, Spokane, County.—"The Chicken KALE plants that you have grown for us has given us excellent results. It supplies an abundance of the best and cheapest green food for our thousands of poultry, from early summer clear into the winter. We will want again for next spring, thousands of Chicken KALE in Flats."

JOHN VAN HEES, Prop.

All prices are net, packed, crated and delivered to transportation carriers here. Express is the usual means of transportation, but parcel post is often the most convenient. To stations where there is no agent all express must be prepaid. Send sufficient to prepay. Any

excess will be refunded at once.

Parcel Post charges in first and second zones up to 150 miles from Spokane on strawberry plants are about as follows: On 500 plants, about 50c, and on 1,000 plants from 60c to \$1.00.

All plants offered in this list are strong, field-grown, the only Perennials that give satisfaction.

ACHILLEA (Millfoll or Yarrow)

POSTPAID
Each Doz.

PTARMICA FL. PL., THE PEARL. For cutting, this is the most useful in hardy plants. Double white flower, produced in great abundance all summer. .30 \$3.00

ANCHUSA

ITALICA (Dropmore Variety)—A beautiful plant for the border in woodlands, producing spikes of gentian blue flowers, 4-5ft. June. .30 3.00

ALYSSUM (Madwort)

SAXATILE COMPACTUM—A dwarf plant suitable for sunny position in rock garden or in front of border, bearing a great abundance of yellow flowers in May. 1 foot. .30 2.50

ASTERS (Michael Mass Daisies)—Showy late Flowering. Postpaid .30 3.00

ANTHEMIS (Hardy Margarite)

TINCTORIA KELWAYI—Beautiful daisy-like flowers, of clear yellow; very useful for cutting. 2 feet. June-October. .25 2.25

AQUILEGIA (Columbine)

Indispensable for the herbaceous border and rock-garden. Their various colored flowers are valuable for cutting and any form of floral arrangement. **CHRYSANTHA**—Very graceful, soft yellow flowers. 2½ feet. May-June.

COERULEA—Blue and white. 2 feet. May-June. **LONG SPURRED HYBRIDS**—Various colors with long spurs, excellent for cutting. .30 3.00

ARABIS (Rock Cress)

ALPINA—Pure white, very useful for rock-garden or edging. 9 inches. April-May. .30 3.00

ARMERIA (Thrift)

A plant of dwarf tufted habit, suitable for border or rock-garden. Extra fine for cut flowers. **FCRMCSA**—Flesh to deep rose. 9 in. June-July. .30 3.00

ARTEMISIA (Summer Fir) Hardy Annual

Forms pyramidal shaped bushes with rich, dark green foliage, 3 to 5 feet high, branching freely, giving it the appearance of a nicely developed Christmas tree. It is pretty as a pot plant or may be grown successfully as a solitary specimen, clump or hedge. .30 2.50

BABY'S BREATH (See Gypsophila)

CAMPANULA (Bellflower or Harebell)

Largest and most beautiful family of border plants in cultivation. Very free flowering and easy growing. **CARPATICA**—A dwarf variety, suitable for the rock-garden, having blue cup-shaped flowers. 9 in. June-August. .25 2.50

MEDIUM CALYCANTHEMA (Cup and Saucer)—This is one of the most popular and hardiest forms. Single cup-shaped flower set in a saucer-like calyx. Entire flower of one color. .30 3.00

CHRYSANTHEMUM MAXIMUM ALASKA (Shasta Daisy) A much improved hardy daisy, bearing a profusion of large, white flowers from early summer until late in the fall. Fine for cut flowers. .30 3.00

COREOPSIS (Tickseed)

LANCEOLATA GRANDIFLORA—The flowers are a rich golden yellow of slender graceful form, making them an excellent cut flower. 2 feet. All summer. .25 2.50

DELPHINIUM (Hardy Larkspur)

The Delphinium is beyond question the Queen of all Blue Flowers. Their wonderful stateliness, and their loose graceful shape of flowers and fine blue colors, makes them suitable for most any floral-work. As cut flowers they bring a good price at any time of the season.

BELLADONNA

BELLADONNA—The most popular variety. The sky-blue flowers are freely borne on numerous branching stems until frost. 4 feet. Fine field grown plants. .30 2.50

DIANTHUS BARBATUS (Sweet William)

While it is impossible to determine the value of this group of the most popular old fashioned garden plants, we know that their striking colors, pleasing fragrance and freedom of blooming, make them a favorite with all lovers of hardy flowers. Where an abundance of cut flowers is desirable, these cannot be surpassed. Florists throughout the country highly praise them for summer cutting.

MIYED—An array of the most beautiful colored flowers which are lasting and excellent for cutting. 1-1½ feet. May-June. .25 2.50
NEWPORT PINK—A soft salmon pink. (New). .30 3.00
SCARLET BEAUTY—A vivid scarlet, making a striking contrast with the other varieties. .30. 3.00

DIELYTRA, OR DICENTRA

POSTPAID
Each Doz.

SPECTABILIS (Bleeding Heart or Seal Flower)—An old-fashioned favorite; its long racemes of graceful heart-shaped pink flowers are always attractive; it is used largely for forcing, and is perfectly at home in any part of the hardy border, and especially valuable for planting in the shade. .75 8.00

EXIMIA (Plumy Bleeding Heart)—A dwarf-growing sort, with beautiful, finely cut foliage and showy racemes of pretty pink flowers throughout the season. Too much cannot be said for this fine border plant as it is equally at home in full shade or sun and perfectly hardy anywhere. Bailey's "Encyclopedia of American Horticulture" says in description: "The handsomest foliage of any border plant in the entire collection." This variety of Bleeding Heart is the only kind which will replace the Spectabilis which is so hard to get. Will grow in any climate under any condition. .40 4.00

DIGITALIS (Foxglove)

One of the most popular plants of today, throwing a flower spike, tall and stately to the height of from 4-6 feet. July-August. **MONTROSA**—Large flowers of cup-shape, unusually tall and effective in the garden. All shades. .30 3.00

DORONICUM (Leopard's Bane)

CAUCASICUM—Large bright yellow flowers; one of the most effective early spring flowering perennials. Effective as a single plant, or in a hardy border. It is a splendid flower for cutting, as it carries well and stands a long time in water. They succeed well everywhere. .30 3.00

GYPSOPHILA (Baby's Breath)

Very branching or spreading slender herbs, with scant foliage when in bloom. Of easiest culture in open, rather dry places. Desirable where a mass of delicate misty bloom will fill in a bare place.

PANICULATA COMPACTA. When in bloom in August and September it forms a symmetrical mass 2 to 3 feet in height and as much through, of minute white flowers having a beautiful gauze-like appearance. Postpaid, each, 30c; dozen, \$3.00.

HEMEROCALLIS
Yellow Day Lily
Lemon Lilies, or Hemerocallis flava, have long been favorites in our

garden, and are always included in any list of the most popular hardy plants. All of the varieties of Hemerocallis are desirable and beautiful. The tall, graceful, grass-like foliage is very handsome and sets off the charming, lily-like

Perennials Continued

flowers very effectively. They look particularly well naturalized along streams or on moist banks and will thrive most luxuriantly in partial shade.

FULVA (Brown Day Lily)—Coppery orange, shaded crimson. 3 feet. July..... **.35 3.25**

HEUCHERA (Sanguinea)

Blooms in May. 12 to 18 inches. June to September. Flowers bright crimson; very free-flowering. Nice for cutting. Excellent for rock-garden..... **.40 4.00**

NEW GIANT-FLOWERING MARSHMALLOWS OR HIBISCUS

A wonderfully improved form of our greatly admired native Marsh-mallow or Rose-mallow, in which not only the colors have been greatly intensified, but in which flowers of enormous size, frequently 10 to 12 inches in diameter, have been developed. Equally at home in all positions, having the same vigor in dry and wet ground; perfectly hardy. They grow from 5 to 8 feet high and are very floriferous, blooming from early in July until late in September. We offer three distinct colors: Red, Pink and White.

1 year **.20 2.00**
2 years **.35 3.50**

HOLLYHOCKS

Under our improved methods we grow Hollyhocks that are absolutely FREE FROM RUST. Do not make a mistake and buy without this assurance.

DOUBLE VARIETIES MIXED..... **.25 2.50**
Double Varieties in separate colors, maroon, red, rose, salmon, white and yellow..... **.50 3.00**

IRIS FLAGS (Liberty Iris)

The Iris is one of the finest, if not the finest, of our hardy plants. Not particular as to soil or location, but asking only that the sun shine on it, it throws up spikes of bloom that are marvelous in their delicacy of structure and the colorings which are exquisitely dainty are wonderful in their blendings and variety.

They are very effective planted in groups and if used for borders are particularly desirable in that the foliage remains fresh and upright after the blossom stalks are removed.

FLORENTINE ALBA—Creamy white, flushed lavender, very early and fragrant, fine cut flower.

PUMILA—Violet blue. "F" deep violet purple.

SAN SOUCI—Canary yellow. "F" yellow with brown.

PERFECTION—Standards fresh lavender, flecked with deeper shade; falls rich velvety lavender, dark reflections. A most pleasing and highly attractive combination, very well named. Has more blossoms on one stalk than any other sort.

Postpaid, Each, 10c; Doz., \$1.00; Net Prepaid, 100, \$5.00

LATHYRUS LATIFOLIUS (Perennial Sweet Pea)—A vigorous climber. Suitable to cover unsightly places. Flowers all summer; excellent for cut flowers.

SEPARATE COLORS—Red, pink and white.

WHITE PEARL—A fine white.

PINK BEAUTY—A very fine cut flower, beautiful pink.

Postpaid, Doz., 30c; 100, \$1.50

LILY OF THE VALLEY (Pips)—..... Each, 10c; Clumps, 50c

LILIUM (Hardy Lily)

TIGRINUM SIMPLEX—The well known Single Tiger Lily. Each, 35c

MYOSOTIS (Forget-Me-Not)—Beautiful small blue flowers, excellent for floral decorations and designs. Through planting in a moist shady place the flowering period may be much prolonged. Postpaid, Each, 25c; Doz., \$2.25

PAPAVER (Poppy)

NUDICAULE (Iceland Poppy)—A neat dwarf-like plant, from which spring graceful leafless stems with charming cup-shaped flower in great abundance, throughout the entire summer, making them a desirable cut flower. We offer them in separate colors: orange, white, yellow.

ORIENTALS (Oriental Poppy)—Nothing in the hardy plant line can compare with the Oriental Poppy for brilliancy and beauty. With their large fiery scarlet flowers, they are conspicuous in any position. 3-4 ft. May-June. 2 years old.

Each, 30c; Doz., \$2.50

PENSTEMON (Beard Tongue)

PENSTEMON (Beard Tongue)—A handsome plant with graceful slender stems covered almost the entire length with bright colored flowers. Invaluable for cutting.

BARBATUS TORREYI—Bright Scarlet. 3-4 ft. June-Aug. Each, 30c

PHLOX (Hardy Perennial)

Beauty and usefulness bring these hardy border plants among those of greatest importance. For massing they are very effective and their great variety of colors add a brilliancy to the landscape. Their flowering season begins in July and when the past bloom spikes are removed, the blooming period may be prolonged until fall.

BRIDESMAID—Pure white with crimson eye, extra tall.

EUROPE—White, large red center, large.

ISABEY—Salmon pink.

JEANNE D'ARC—Pure white, late flowering.

FAUST—White with crimson center.

LA VAGUE—Lavender pink.

MICHAEL BUCKNER—Dark purple.

Postpaid, Each, 30c; Doz., \$3.00

WRITE FOR PRICES ON LARGER QUANTITIES

RUDBECKIA (Coneflower)

GOLDEN GLOW—One of the most popular hardy plants. Grows six feet high, producing masses of large, double, golden yellow flowers, shaped like a cactus dahlia. Postpaid, Each, 35c; Doz., \$3.00

SCABIOSA

Handsome border plants, succeeding in any ordinary soil if well drained and in a sunny location, and should be grown in every garden where cut flowers are wanted; they last a long time when picked and placed in water.

CAUCASIA (Blue Bonnet)—A soft and charming shade of lavender; commences to bloom in June, throwing stems 18 to 24 inches high until September..... Postpaid, Each, 30c

STATICE (Great Sea Lavender)

LATIFOLIA—Invaluable for cutting and floral work. Minute purplish flowers during June and August. 2 ft. Postpaid, Each, 30c; Doz., \$2.50

TRITOMA (Red-hot Poker, Flame Flower, or Torch Lily)

PFITZERI (The Everblooming Flame Flower)—The early, free and continuous blooming qualities of this variety have made it one of the great bedding plants, and when we consider that there are few flowering plants which are suitable for massing under our severe climatic conditions, it is little wonder that such an elegant subject should become so popular. Succeeds in any ordinary garden soil, but responds quickly to liberal treatment. Hardy if given protection..... Postpaid, Each, 40c; Doz., \$3.50

PFITZERI (The Everblooming)

YUCCA (Adam's Needle)

FILAMENTOSA—Among hardy plants there is nothing more effective and striking for isolated positions on the lawn or on dry banks where few other plants thrive. It is also indispensable for the rockery. Its broad, sword-like, evergreen foliage and immense branching spikes of drooping, creamy white flowers, rising to a height of 6 feet, render it a bold and handsome subject wherever placed. Should be planted in spring.

Postpaid, Each, 40c; Doz., \$3.50

HARDY VIOLETS (Sweet Scented)

DOUBLE RUSSIAN—Not suited for forcing under glass, but is perfectly hardy, producing in early spring, large, double, deep purple flowers of exquisite fragrance.

Postpaid, Each, 40c; Doz., \$3.50

ORNAMENTAL GRASS PLUME—A handsome imitation of Ostrich Plume. The bloom is an everlasting..... Postpaid, Each, 50c

HEDGE AND CLIMBING PLANTS

The hedge plants make the frame of your natural home picture. The climbers cover and beautify the rough and uninviting porches and walls.

HONEYSUCKLE

Their vining qualities are all that can be desired, but the fragrance of their flowers makes their strongest bid for favor.

HALLEANA—Color an intermingling of white and yellow. Extremely fragrant and most satisfactory. Postpaid, Each 50c; Doz. \$4.00

50 **HCP ROOTS**—A leading climber for porches, verandas, etc. Propagated by pieces of underground roots. Postpaid, Each, 10c; Doz., 75c; 100, \$5.00

214 **CLEMATIS HARDY (Paniculta)**—One of the most satisfactory climbing plants..... Postpaid, Each, 50c

274 **KUDU VINE**—Will grow 40 feet in one season from established roots..... Postpaid, Each, 20c

215 **IVY HARDY ENGLISH**..... Postpaid, Each, 50c

216 **AMPELOPSIS VEITCHI (Boston Ivy)**—For covering cement, brick, stone or wood and clings to the smoothest surface. Beautiful foliage..... Postpaid, Each, 35c

62 **PRIVET (Ligustrum Vulgaris)**—This hardy privet will make the most beautiful and lasting hedge. Used as a border it will complete the lasting and natural beauty of your home and grounds. Not Prepaid.

2 to 3 feet each, 50c; per 10, \$1.00; per 100, \$30.00

61 **HONEYSUCKLE**—Tartarian. A beautiful flowering shrub. One of the hardy growing hedge and screen plants. Probably the most rapid grower of all the hardy shrubs, often attaining a height of ten or more feet in a few years. Not Prepaid.

2 to 5 feet, each, 75c; per 10, \$6.00; per 100, \$50.00

52 **SYRINGA (Lilac)**—S. Vulgaris. Purple. Too well-known to need any description. Strong roots. Postpaid, Each, 50c; Doz., \$4.00

Then we grow plants for the beautifying of your home. Please look through our catalog, make out an order and let us help you to secure a better garden—a more attractive home and grounds.

Flowers improve the appearance of your home and the children will never forget mother's flower garden.

- WRITE US** your wants in Potted Plants. We grow many not listed here.

Everblooming Cannas

No flowers will make such an attractive bed. Rapid in growth, freedom of bloom and ornamental foliage makes them so desirable for planting in beds, on lawn or yard, and especially after early blooming bulbs are done.

KING HUMBERT—A glorious Canna. The finest we have ever seen. Grows to a height of about 5 feet. Immense dark bronze foliage with great heads of orange scarlet flowers, striped crimson.

GOLDEN GATE—3 1-2 feet. Blooms when opening are almost pure gold, but soon change to orange-crimson and apricot, with deep carmine red at throat. Very striking.

WINTZER'S COLOSSAL—4 feet. The gorgeous, vivid scarlet blooms produced all summer long. Blooms retain their color during the hottest weather.

AUSTRIA—Chrome yellow. Pretty.

CRIMSON BEDDER—Crimson. Beautiful.

MME. CROZY—A vermillion with a gold edge.

WYOMING—A large showy orange color.

NOT PREPAID—All Cannas in 4 and 5 inch pots.
Each, 35c; Doz., \$3.50

Petunia

ROSES

THE QUEEN OF FLOWERS

Plant a ROSE and enjoy the pleasure of their beauty, the fragrance of their bloom, the wonder of their color and the admiration of your friends.

SOME SUGGESTIONS AS TO PLANTING AND CARING FOR THEM

Roses can be planted either in the fall or spring when there is no frost in the ground. Early planting is best. Where mild climatic conditions prevail, fall planting is recommended.

Dig the hole eighteen inches deep; cut off broken or injured roots; hold the plant in position, spread out the roots so they do not cross or crowd one another at any point, fill in the holes carefully with the fertile top and soil, pressing it firmly in about the roots. A small handful of finely ground bone meal sprinkled in is very helpful.

After the hole has been filled and dirt pressed firmly, cut back the top canes one half to two thirds, then mound loose dirt up about them for six to ten inches. This mound of dirt should be placed about the canes whether the Roses are planted in the fall or spring—otherwise they are apt to dry out. If the Roses are planted in the fall, this mound should be covered with a thick mulch of straw or leaves. As soon as the buds start to grow, rake away the mound and cut back the canes, leaving two to four buds to each cane. Make this cut just above a sound outside bud, so that the new canes will grow outward and make a shapely bush.

All our Roses are on their own roots

H. T. Hybrid Teas.—H. P. Hybrid Perpetual—Cl. Climbers
Special prices on lots of one dozen or more upon application. Prices here quoted postpaid.

(Continued on next page)

Gladiola

The Gladiolus, as we know it today, easily takes a place in the front rank as one of the most useful and beautiful members of the floral kingdom. It is one of the most easily grown and universally adaptable of all flowers. In its stately, majesty and beautiful tints and variety of color blendings it has few equals. In the garden its long season of bloom, together with its great variety of color, form and types, makes it one of the most striking and noble of all garden subjects, and in the hands of the floral artist it lends itself to all manner and kinds of floral arrangement. It is suitable for a wide range of floral uses and as a decorative subject, has few if any equals.

The beautiful and easily grown Gladioli should find a place in every flower lover's garden. The bulbs or corms are planted two to three inches deep in most any soil and location, setting the bulbs about six or eight inches apart, in the row and the rows two feet or more apart. Cut the spike when the first flower opens and then placing in the water inside the entire spike will develop gradually its entire flower blooms.

VARIETIES OF REAL MERIT

	Prepaid Each Doz.	
PRINCE OF WALES —Strawberry pink shading to a very pale pink throat. Faint scarlet blotch on lower petals. Strong spikes. Flowers large and well arranged. In a class by itself.....	\$0 15	\$1.50
SCHWABEN —Marguerite yellow with small amaranth purple blotch on lower petals. Very heavy spikes and foliage. Flowers well open and of good substance.....	.10	1.00
WILBRINK —One of the earliest. Pale livid pink, upper petals tinted slightly darker. Lower petals have a light amaranth purple blotch on a yellowish ground.....	.10	1.00
GENERAL JOFFRE —The improved "War." Scarlet red slightly mottled deeper scarlet. Spike strong and straight. Blooms earlier than "War" and is a much better grower10	1.00
GRETCHEN ZANG —Vinaceous pink shading lighter. Scarlet-red blotch on old rose ground. Spike strong, many flowers open. Fine cut-flower variety.....	.10	1.00

Roses

LOS ANGELES, (H. T.)—One of the finest Roses ever introduced. The growth is very vigorous, and produces a long-stemmed flower of a luminous flame-pink, toned with coral and shaded with translucent gold at the base of the petals. The buds are long and pointed. Each—1 yr., 60c; 2 yr., \$1.10

CLIMBERS

DOROTHY PERKINS—Wichuraiana—A hardy climber. Soft shell pink in color, flowering profusely in large clusters. Fragrant and lasting. Each—2 yr., 75c

DR. W. VAN FLEET, W.—Flowers when open run four inches and over in diameter. The center is built high, petals beautifully undulated and cupped. The color is a delicate shade of flesh-pink on the outer surface, deepening to rosy-flesh in the center. Each—2 yr., 85c

TAUSENDSCHOEN—Soft pink, flowering freely in large clusters; vigorous and almost free from thorns. Each—1 yr., 35c; 2 yr., 75c

CRIMSON RAMBLER—Too well-known to need description. Each—1 yr., 35c; 2 yr., 75c

"IF IT'S A PLANT WE GROW IT"

I sent you an order the last part of February for one hundred Superb Strawberry plants. They arrived in fine condition and are doing fine. This fills my needs for this year.

JOHN A. MATHISEN,

Peony

There is scarcely any other perennial that equals the Peony. The beauty of its delicate colors equals the rose and its massive boldness rivals the Dahlia. Like all of the perennials, because of their permanency, it is attracting the lovers of home flower gardens.

While September is the best time to set the roots, yet most of our clumps will bloom this year if set very early in the spring.

PEONY

170	AUTUMN GOLD—Autumn shades.	Each, 35c

Flowering Plants

In beauty asters rank next to peonies and roses; their blooms are large and heavy and most brilliantly colored. Once you try them you will grow them every year for their beauty and because they are about the easiest flowers to raise. They make a grand cut flower and are a highly paying crop for that purpose. The most popular colors are the soft pink and lavender shades. They are extraordinary showy when planted in masses and no flower will show off to better advantage than the aster in front of shrubbery or to fill vacancies in the hardy border. They will stand more cold than cabbage and can be sown or set out quite early. If sown as late as June the first, will give a good fall bloom, even in the North.

In order to get choice extra large blooms you must not allow more than about 10 blooms to each plant. It will pay you to disbud, as choice flowers always sell and always for a good price.

GIANT BRANCHING OR CREGO ASTER

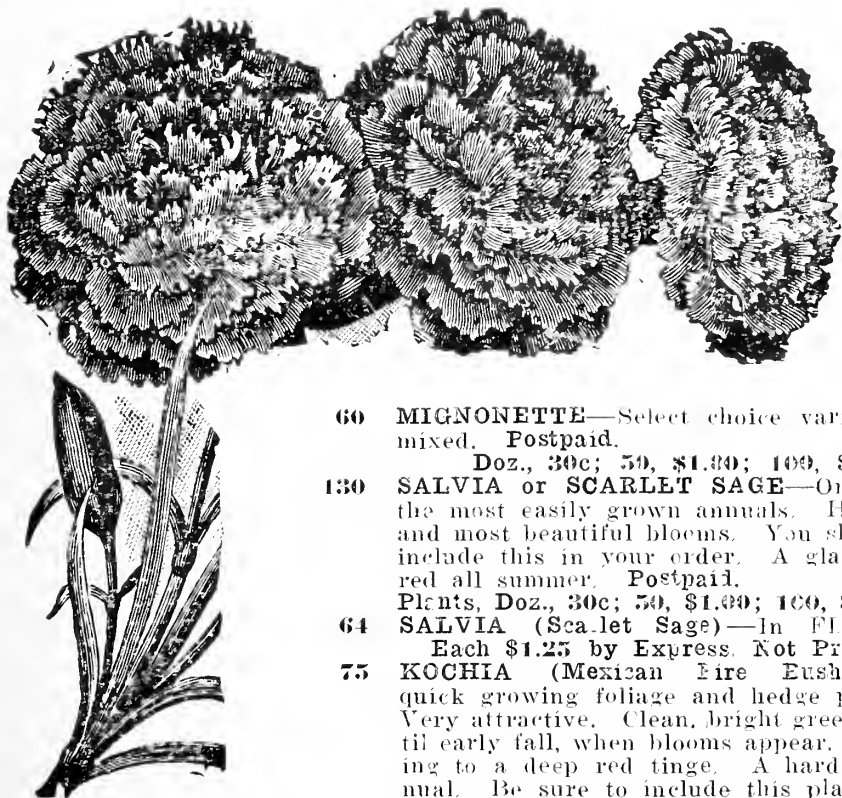

A magnificent American strain especially adapted to our climatic conditions. The plants form strong, branching bushes about 2 feet high bearing on long stems their handsome chrysanthemum-like flowers averaging 4 inches or more across. They come to bloom from 2 to 3 weeks after the average type, thus lengthening the aster season until after frost. Extremely free flowering and a grand cut flower.

AZURE BLUE, CRIMSON, PINK, LAVENDER, PURPLE, ROSE, WHITE, YELLOW, MIXED. Postpaid, Doz., 30c; 50, 75c; 100, \$1.25

- 130 **SALVIA or SCARLET SAGE**—One of the most easily grown annuals. Hardy and most beautiful blooms. You should include this in your order. A glare of red all summer. Postpaid. Plants, Doz., 30c; 50, \$1.00; 100, \$1.50
- 64 **SALVIA (Scarlet Sage)**—In PLATS. Each \$1.25 by Express. Not Prepaid
- 75 **KOCHIA (Mexican Fire Bush)**—A quick growing foliage and hedge plant. Very attractive. Clean, bright green until early fall, when blooms appear, turning to a deep red tinge. A hardy annual. Be sure to include this plant in your order. Postpaid. Doz., 35c; 50, \$1.00; 100, \$1.50

AMARANTHUS—"MOLTEN FIRE" (Burbank's)

Nothing can compare for royal abundance and brilliancy of color. It grows four feet in height by three feet in diameter. About August first you will have a bushy plant some two to three feet high with broad, bronzy-crimson coleus-like leaves. At this time the leaves at the top and all the side branches of the plant begin to open like gigantic dahlias of a surpassingly brilliant, iridescent color, hardly to be found outside of an electric furnace, being of a clear, glistening, fiery, rosy crimson, increasing in size and abundance until the whole plant is illuminated with huge, poinsettia-like tufts of flaming fire which can be seen for half a mile. These retain their brilliancy in best condition for three months or more. No other annual plant ever grown anywhere produces such a wealth of color for so long a time and for so little outlay of time and care.

PLANT PRICES—Postpaid—2 in Pot. Each 20c; Doz., \$2.00

CELOSIA (Parrot's Feather or Coxcomb)—The plants are stocky in growth, the main stem and each branch being terminated by the most lovely plumes, varying from silvery pink, silvery salmon to red, deep red, bright yellow and orange. Doz., 50c

CENTAUREA (Gymnocarpa—Dusty Miller)—The gray fern-like leaves make effective border. Grows 10 inches high. Doz., 40c

SALPIGLOSSIS—The flowers are tub-shaped much like Petunia, but rivaling the latter in the beautiful colors displayed.

Aster

Dahlia

At our annual fall flower show it is conclusively demonstrated by the magnificent exhibits of dahlia blooms by amateurs as well as dahlia specialists that the dahlia will thrive anywhere in the Inland Empire. The dahlia is of such easy culture with the mass of wealth of bloom that every home ground should be early and cheaply decorated.

My offerings are classified in the four most popular types, and in each classification you may find colors to suit the most fastidious. Out of the hundreds of varieties you will find these most popular.

CACTUS

- 150 **AMAZONE**—Large, free blooming, red diffused with purple. Each, 30c
- 153 **FERNAND OLIVET**—Hybrid, large, maroon with dark center. Each, 35c
